INTRODUCING SCN ACCOUNTING PROGRAMME

SCN ACCOUNTING is an accounting plus business management software that is designed specifically for small and medium sized businesses.

Packed with all of the standard accounting features, such as general ledger, invoicing, bill paying, and inventory tracking.

SCN ACCOUNTING Professional Edition

Everything in the standard edition, plus additional features like quotation, sales order, delivery order, purchase order and multi-users, to help you better manage your business.

In Summary, SCN ACCOUNTING

- is very user friendly
- is a real-time accounting system that provides up-to-date accounting data all the time
- has functions that facilitate the full sales and purchase processes
- supports customizable and multiple document formats.
- supports drill-down to source documents
- comes with a graphical report designer
- is powerful, versatile and more ...

An easy to use accounting system that provides a total business solution to small and medium sized companies.

Modules:

- general ledger management,
- sales processing (includes quotation, sales order, delivery order, sales invoice, credit memo and cash sales),
- purchase processing (includes purchase order, goods received note, purchase invoice, debit memo and cash purchase),
- cash management,
- inventory management,
- user management,

- report designer, and more.

Why Use SCN ACCOUNTING?

Modules are tightly integrated

Any accounting program can get you organized, but SCN ACCOUNTING makes it easy. With all the modules tightly integrated, SCN ACCOUNTING manages to simplify your data entry tremendously. Just key in your transaction (for e.g. sales/purchase invoice, credit/debit notes, etc) into SCN ACCOUNTING and all the affected accounts (for e.g. customer/vendor accounts, sales account, inventory account, etc) will be updated automatically.

Support the full sales and purchase processes

Unlike many of the other accounting programs that support only part of your sales and purchase process, SCN ACCOUNTING covers the full sales and purchase process. It also has functions to copy data from one type of document to another (for e.g. a sales quotation to a sales order, a sales order to a sales invoice, etc), saving you the need to re-enter the same data again.

No more arcane code

SCN ACCOUNTING uses account name instead of account code, so say goodbye to all the arcane account code that you used to remember when using other accounting programs.

Up-to-the-second accounting information

SCN ACCOUNTING is one of the new generation accounting systems that support real-time update. This means you will be able to get up-to-date data and reports any time of the day.

No more unwanted steps

With SCN ACCOUNTING, you are no longer required to do daily posting and month-end closing, as these are just steps carried over from the manual accounting system. In a computerized system, data can be updated and reports can be computed easily, therefore periodic processing like daily posting and month-end closing are no longer necessary.

A more flexible system

With SCN ACCOUNTING you are no longer restricted to generating reports which can only fall on the month-end. Now you can generate reports on any date or in any period you specify.

No more messy transaction records

When you correct mistakes on a business document (for example a sales invoice or a cash receipt), SCN ACCOUNTING will update the original transaction records accordingly. So you no longer have to grapple with messy records dotted by all the reversals and repeated entries in your transaction records. What's more, if you turn on the audit trail feature, SCN ACCOUNTING will keep a copy of the old transaction record every time a transaction record change and that enables you to track the changes made.

Highly very flexible invoice entry

SCN ACCOUNTING gives you a lot of flexibility in filling an invoice. It allows you to enter entries like a sub-total, a percentage discount, a comment, etc into you invoice lines.

Configurable user access control

Understanding that your accounting system is accessed by different people for different purposes, SCN ACCOUNTING has built in a comprehensive access control mechanism whereby every component in the system is protected and can only be accessed by users with the corresponding rights.

Below is a table listing the key features available in SCN ACCOUNTING Standard and SCN ACCOUNTING Professional editions:

Feature	Standard Edition	Professional Edition

Others		
Multi-User Support		✓
Cost	₦ 200.000.00	₦500.000.00

Point of Sales

When connected with a cash drawer and a printer (including receipt printers), you can convert your SCN ACCOUNTING into a Point of Sales system.

With SCN ACCOUNTING working as your POS system, you no longer need to manually copy your daily sales from your cash register to your accounting book because in SCN ACCOUNTING this update is automatic and instantaneous.

Thanks

Samuel Williams
